## DETAILED ACTION

### *Allowable Subject Matter*

Claims 1, 2, 3, 5, 7, 9-16 allowed.

The following is an examiner's statement of reasons for allowance:

Re clm 1, the prior art of record does not teach nor render obvious the claim combination wherein comprising a plate-link chain that includes pins and the sensor detects the pins as they pass the sensor, wherein the sensor is located at a position relative to the path of movement of the chain that is independent of the rotational speed relationship of the conical pulley pairs and is connected to a control unit within which chain structural data are stored, and which determines the speed of the chain based upon the number of pins detected and time intervals between the pin detections; and wherein the chain has different pin spacings.

Re clm 13, the prior art of record does not teach nor render obvious the claim combination wherein comprising a guide bar pivotable about a pivot axis parallel to the axes of the disk pairs, wherein the guide bar includes a passageway section defined by pairs of spaced walls that surround and enclose a portion of the chain as it moves along the guide bar; and a sensor carried by the guide bar at the passageway section and extending into the chain receiving opening of the guide bar, wherein the sensor is positioned opposite to and facing ends of the pin pairs of the endless torque-transmitting means for detecting end faces of the pin pairs as they pass the sensor.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
